The software has been developed for the Industrial Estate Management System (Applicant Login) web portal of the Directorate of Industries & Enterprise Promotion, Uttar Pradesh.

This module has been designed and developed to enable applicants to apply, manage, and review their service requests through the web portal. It allows users to register, log in, submit and track applications, and provide the necessary details required for processing, all within a centralized online interface.

Along with the project details, notifications, intimations, and the status of acceptance and rejection will be available to the respective users for further processing.

The concerned departmental users can also view the status of the entire project execution through their login. They will receive SMS and email alerts at all necessary stages of the process.
